ABOUT ME

Hi there, I'm Mauricio, but you can call me Mauro. I am a Systems Technologist specialized in front-end development, with strong skills in technologies such as React, JavaScript, HTML, and Tailwind css, among others. I'm always looking for new challenges and opportunities to grow in my field. What sets me apart is my self-taught approach. I love learning and constantly seek ways to improve my skills. I've developed my expertise through a combination of independent studies and freelance projects, which have allowed me to explore various aspects of web development and continuously expand my skill set.

EXPERIENCE

Freelance Frontend Developer

El portal del trueque

February 2024 - May 2024

- Developed specific user interface components using React.js to enhance the user experience on the website. Collaborated in creating and optimizing key functionalities to ensure smooth navigation and intuitive interaction. [Website](#)

April 2024

Imys Oficial Website

- I used Astro to develop the user interface, ensuring compatibility and an optimal user experience on mobile devices and tablets by implementing a responsive design for seamless viewing across various screen sizes. [Website](#)

Mis emisoras

March 2024

- I developed specific interface components using React.js to enhance the user experience of the website. I collaborated on the creation and optimization of key functionalities, ensuring smooth navigation and intuitive interaction for users.
